---

### WORK EXPERIENCE

Frontend Engineer, Internship, Enextgen Wireless Limited, Nigeria, August 2024 - October 2024

- Optimized and built responsive UIs with React, Shadcn UI, and Tailwind CSS, improving performance and reducing load times by 20%.
  - Collaborated with an Agile team to develop user-friendly internet speed test web apps, integrating PostgreSQL for seamless data management.
- 

### PROJECTS EXPERIENCE

WavvySort | [Link](#) — A multi-functional platform for creating markdown content and accessing it in HTML. | Next.js, React, TypeScript, Tailwind CSS, Shadcn UI, Supabase, Markdown

- Engineered a dynamic and responsive web app using Next.js, Tailwind CSS, and Shadcn UI with reusable components, improving development speed by 40% and ensuring a smooth user experience on all devices.
- Integrated a markdown-based rich text editor for seamless content creation and publishing, with backend logic to render markdown as HTML for better readability.
- Integrated voice feature which allows users to listen to content, catering to those who prefer auditory learning or accessibility needs.
- Implemented interactive features like commenting, liking, and sharing, enhancing user engagement and fostering community discussion.
- Focused on further enhancements, including scalability, with plans to integrate unit and end-to-end testing for greater reliability and performance.
